Personalized Practice & Instruction
to Drive Growth for All Learners

Take advantage of discounts on purchases prior to October 30, 2020!

Grades 2–8

See how Waggle® complements
The newest Waggle® release for GO Math! unites the best in dynamic personalization with powerful instructional lessons, immersing students in an unparalleled world where learning takes flight!

Unlike other programs, Waggle keeps the teacher in control. Teachers can manually assign relevant content or ask Waggle to auto-assign lessons, enabling educators to maximize their time in and out of the classroom.

Powerful Personalization

Many programs claim to provide "personalized practice", but only Waggle dynamically adapts to students’ knowledge in real time.

Go beyond a pretest and posttest to assess students’ skills proficiency during practice.

Guidance and Assessment

Say “goodbye” to end-of-unit surprises: Waggle dynamically routes students to relevant practice and instructional content while providing teachers with skills-specific insights every step of the way.

Flexible Implementation

Your classroom is a living and breathing space, so we made Waggle as flexible as you are. Districts use Waggle in a wide variety of settings, ranging from the core classroom to before/after school to computer lab time.

Waggle’s flexibility makes it an ideal fit for multiple settings, including before and after school, study hall, computer lab, 1:1 device time, and more.

*Waggle* is powerful support for any teaching model—in person, remote, or hybrid.
Robust & Inclusive Instructional Support

Social Emotional Learning

*Waggle* supports students in developing social emotional learning competencies through content, reflections, and interactions with others. Embedded hints and feedback help students develop a growth mindset, unlocking their inner academic potential.

Social-emotional learning is woven throughout *Waggle*, including its games and instructional content.

Scaffolds in skills practice use translanguaging strategies to leverage students’ primary language knowledge to build metalinguistic awareness.

English Learner Support

*Waggle* provides robust support to English learners, including tools to access challenging language and terms. Idioms, cognates, cultural references, and more are called out in text and audio to support EL students.

Student Agency, Ownership & Identity

Students have the opportunity to make a variety of choices throughout *Waggle*, from selecting their avatar to choosing which worlds to explore. These are a few of the small ways in which students invest in their *Waggle* success on a daily basis.
A Connected Teacher & Student Experience

1. Teacher instruction
The teacher leads a lesson from GO Math!

2. Teacher-assigned or auto-assigned content
The teacher can either assign specific learning goals that complement the lesson or ask Waggle to auto-assign relevant content to the class.

3. Adaptive skills-based practice
Students engage in adaptive skills-based practice that adjusts in real time to keep them in their Zones of Proximal Development.

4. Precise skills gaps pinpointed
Waggle pinpoints precise skill gaps during students’ practice—no additional testing required.

5. Targeted instructional content recommendations
Waggle recommends appropriate content for each student based on their needs. This remediation or enrichment provides students with a solid foundation to embark upon the next lesson in core instruction.
Supplemental, Adaptive Practice & Instruction That Complement GO Math!

Reinforce core lessons with personalized practice for every student.

An Empowering & Enriching Student Experience

Waggle gives students the tools to unlock their inner potential! By addressing the needs of the whole student, Waggle motivates learners to achieve new proficiency gains and develop a growth mindset that will benefit them in years to come.

The Whole Student

Students enter the classroom with an incredible variety of backgrounds, motivations, and proficiency levels. We know that they’re more than a test score, and that’s why we challenge them to demonstrate positive learning behaviors throughout the program. Whether accessing scaffolded hints or mastering a new skill, Waggle promotes the power of “I can!”

True Personalization

Personalization should go beyond right and wrong answers, so Waggle evaluates the student’s knowledge, behavior, and content factors when selecting which practice and instruction to present. Serving students content that engages them in productive struggle is a key factor in driving growth.

Multimedia Experiences

Learning isn’t one size fits all, and neither is Waggle. Students engage in rich multimedia experiences and encounter a wide variety of item types—ideal practice for online high-stakes testing.

Students can track their skills progress and achievements in real time.

**Acceleration Through Striving**

*Waggle*’s precise personalization keeps students engaged in their Zone of Proximal Development. The result? The feeling of “I’m almost there” propels students towards mastering new skills.

Video lessons provide timely, rigorous instruction at critical learning moments.

**Rewarding Proficiency**

*Waggle* goes beyond the learning goal and standard to drill into individual skills. This gives students the precise practice and instruction they need to achieve great things. Students love receiving in-program rewards, and teachers appreciate receiving clear insight into which students have accomplished their goals!

**Promoting Resilience**

Many students have yet to hit their academic stride. Just like Rome wasn’t built in a day, neither is knowledge. *Waggle* understands this and rewards students for demonstrating positive learning behaviors that will drive future success.

Promoting and rewarding resilience builds a growth mindset and gives even striving learners the opportunity to succeed.
