Economics—Scarcity and Economic Reasoning		
Standard 1: Students understand that productive resources are limited; therefore, people, institutions, and governments cannot have all the goods and services they want. As a result, people, institutions, and governments must choose some things and give up others.		
Rationale: Explicitly comparing the value of alternative opportunities that are sacrificed in any choice enables citizens and their political representatives to weigh the alternatives in order to make better economic decisions. This analysis also makes people aware of the consequences of their actions for themselves and others, and could lead to a heightened sense of responsibility and accountability.		
E.1.1	Define and identify each of the productive resources (natural, human, capital) and explain why each is necessary for the production of goods and services.	SE/TE: 7, 8–9, 11, 38, 52, 53, 78, 83, 261, 264, 370–371, 416, 432, 552–553
E.1.2	Explain that entrepreneurs combine productive resources to produce goods and services with the goal of making a profit.	SE/TE: 9, 49, 54–55, 70–71, 73, 78, 92–93, 230

E.1.5	Define scarcity and explain how choices incur opportunity costs and trade-offs.	SE/TE: 3, 4–9, 11, 12–17, 21, 34, 35, 38
E.1.6	Use a production possibilities curve to explain the concepts of choice, scarcity, opportunity cost, trade offs, unemployment, productivity, and growth.	SE/TE: 18–22, 23

Economics—Role of Government		
Standard 4: Students understand that typical microeconomic roles of government in a market or mixed economy are the provision of public goods and services, redistribution of income, protection of property rights, and resolution of market failures.		
Rationale: The political and social reasons for public sector services helps students make better choices about the appropriate size and scope of markets and government. It is also important that students be able to evaluate redistributive effects of government programs.

Rationale: It is important for students to understand possible causes of national economic performance, how changes can produce economic problems (such as unemployment and inflation) or opportunities (such as increased employment). Changes in national levels of economic activity have a profound effect on students' future welfare, their job opportunities, the level of their prospective earnings, and the prices they will pay for things they buy.

Policy makers and the general public continue to examine and debate the overall stabilization effects of public policy actions, because the consequences are so important. Economics—Trade		
Standard 8: Students understand why households, businesses, and governments trade goods and services and how trade affects the economies of the world.		
Rationale: Voluntary exchanges are cooperative activities in which both sides expect to gain, and both usually do. Understanding the win-win nature of voluntary exchange helps students learn that people and organizations trade with one another only when each party offers something that the other party values more than whatever he or she has to trade.
